# BPG Seminar and Training

On August 6th and 7th, BPG had the pleasure of welcoming public authorities, members and associations to the **Seminar Challenges in combating the illegal market in the northern region of Brazil** and the **Training on identifying counterfeit products**, which took place in the city of Belém, state of Pará with the institutional support of the Council for Combating Piracy - CNCP.

The seminar gathered **105 participants from public organizations engaged in combating the illegal market**. Undoubtedly, this was another important accomplishment for BPG in fulfilling its corporate purpose and its DNA of working with the main fronts in the fight against counterfeiting and the illegal market, providing a better connection between companies and public authorities.

## August 09th | BPG Workshop | Manaus/AM | 43 Attendees

BPG attended **6 meetings** and **4 external events** aiming to improve anti-counterfeiting actions in Brazil

## BPG engaged in two important projects to create awareness

**AMBIFALS** | Temporary Museum Collection on Counterfeiting products, it was a joint action with the Chemistry Department and Forensic Science Center of the Federal University of Paraná, which had hundreds of visitors this year. There are also prospects of the creation of a permanent collection for the 1st museum of counterfeiting in Brazil.

We were also invited on August of this year, for another joint project with the State University of the Center West (UNICENTRO - Paraná) and the Association for the Sports Industry and Commerce - Ápice, for a study on the harmful effects of counterfeit footwear.
